

PLANTA Portfolio: Strategic Project Management

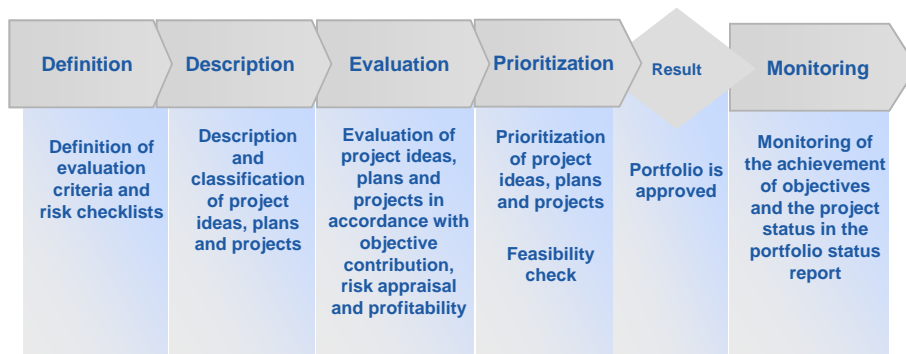

PLANTA Portfolio helps you to answer strategic questions:

- Does the project portfolio map onto the corporate strategy?
- Which projects are now unprofitable?
- Are the projects producing the promised benefits?
- What project risks are we taking on?
- Which projects should be canceled?

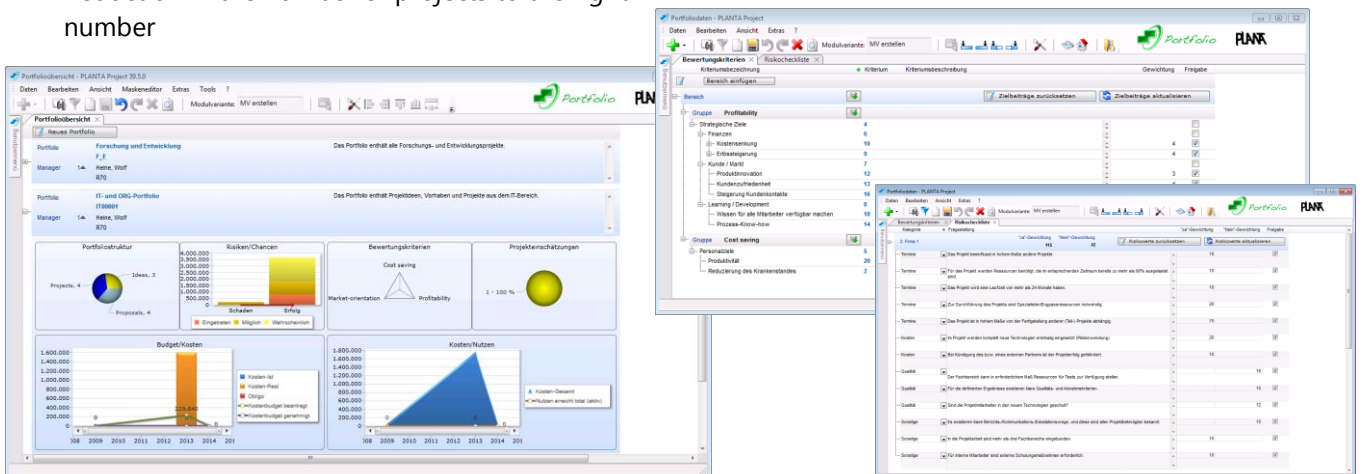

PLANTA Portfolio Workflow

PLANTA Portfolio enables project portfolios to be created and analyzed and supports all the phases of portfolio management, from the definition of evaluation criteria through the classification of ideas, plans and projects, their prioritization, to the monitoring of objectives and projects.

Your Benefits

- Systematic and strategy-oriented planning of the project portfolio in accordance with validated criteria
- Optimization of investment decisions – investment in the “right” projects
- Planning and use of resources according to the project portfolio planned
- Timely identification of opportunities and risks
- Reduction in the number of projects to the right number
- Process-oriented user interface based on company workflow
- Lean database architecture
- High performance even with >1000 users
- Open 3-tier client/server architecture
- Intuitive script language Python
