

PLANTA Project: Planning Projects in a Process-Oriented Way

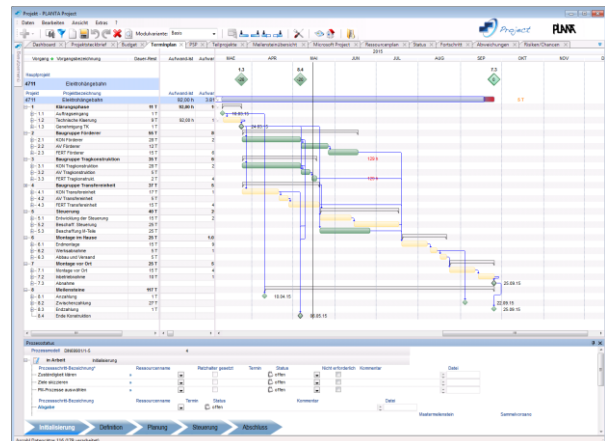

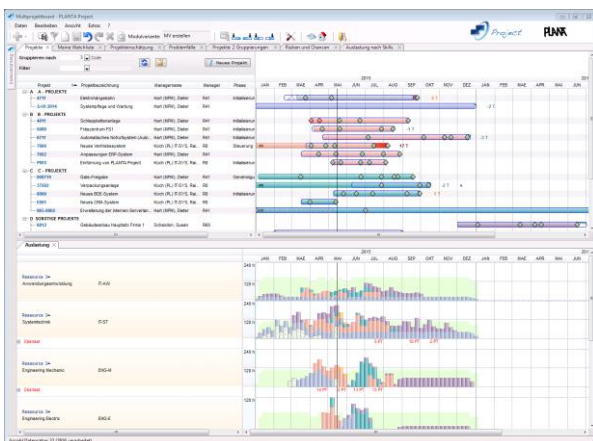

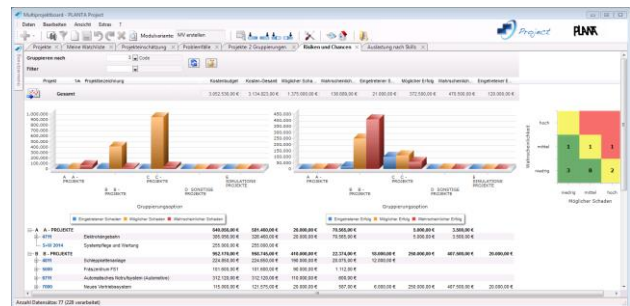

PLANTA Project offers real multi-project management with cross-project coordination of dates, resources and costs. The transparent representation of resource utilization across all the company's projects with the display of free capacities enables resource bottlenecks and schedule conflicts to be identified at an early stage and corrective measures to be implemented in good time.

PLANTA Project provides process oriented multi-project management (with 69901-2 DIN standard, PMI, PRINCE2 or user-definable), workflow-oriented panel technology with flexible viewing window arrangement as well as project team collaborations.

Your Benefits

- Controlling of all projects in the enterprise from the project idea to the archived project
- Overview of the dates, resources, costs of the projects in the company
- Resource bottlenecks can be identified at an early point in time and can be corrected
- Shorter project durations
