PLANTA Integrations & Security

Interfaces

PLANTA enables secure and flexible data exchange with other systems – via standard interfaces to **SAP**, **Jira** or **Microsoft Project**, or individually with the **PLANTA Universal Interface**. Build a seamless, end-to-end project landscape.

ERP Systems

- SAP ERP: PS, CO, SD (SAP-RFC, REST)
- SAP S/4HANA (SAP-RFC, REST)
- proALPHA

Office

- Microsoft 365 (Excel, PowerPoint, Outlook, Word, MS Project)
- Google Calendar
- PDF generation
- Document hyperlinks
- Adaptive Cards

Hybrid PM

- PLANTA Project
- Jira
- GitLab

Custom Interfaces

- Flexibly configurable
- Python API
- REST API
- Webhooks

Authentication & User Master Data

- PingFederate
- Active Directory / Entra Domain Services (LDAPS)
- OpenID Connect, SAML
- Kerberos, OAuth

Reporting

- Export in DATEV format
- Power BI
- QlikView

Common technologies
Web services, REST and SAP RFC calls

Automated
Parameterized interfaces incl. data conversion, validation and preparation

Export formats
.txt, .csv, .mpx, .xml, .html, PDF as well as Excel and PowerPoint

PLANTA Integrations & Security

Your Benefits

Flexible
Parameter-driven import/export

Secure
Full data integrity

Traceable
Logging of all actions

Reliable
Plausibility checks

Easy
Templates and archiving simplify your work

Tailored
The right interface for every customer

Security

At PLANTA, **data protection** and **security** come first – with **ISO-certified servers** and state-of-the-art **data encryption**, whether in the cloud (SaaS) or on-premises.

- **Highest data protection:** Full legal certainty under GDPR & BDSG.
- **Secure data storage:** Servers located in Germany guarantee strict compliance with all German and European standards.
- **Maximum security:** Consistently SSL-encrypted connections and ISO-certified data centers.

SaaS vs. On-Premises

Benefits of Cloud (SaaS)

- Maintenance & support included
- Flexible & ready to use immediately

Benefits of In-House (On-Premises)

- Independent operation
- Self-managed system customizing
- Full control over data and updates
